

MDfit. Online Scheduling Datasheet

Enable round-the-clock scheduling capabilities from your website.

Online Scheduling Benefits

- Advanced “Find-a-Physician” Capability
- Search Engine Optimization
- Automated Patient Appointment Reminders
- Internal Reporting
- 24/7 Scheduling Convenience
- EMR/Scheduling System Integration

Engage Your Patients:

Make it convenient for new and existing patients to schedule anywhere, anytime.

Why Simplicity Rules:

Struggling to implement direct online scheduling? Your patients deserve a straightforward, frictionless, approach to online appointments. Your providers demand an online scheduling strategy that compliments and enhances their current practice.

“

In a world where restaurant tables and movie seats can be reserved online effortlessly, a few simple clicks through MDfit allows your patients to directly book their ideal appointment, 24 hours a day.

”

How it Works

Proper online scheduling starts within your Find-a-Physician tool. We help you correct the data within your current online provider search tool or implement MDfit's built-in provider search and match function. We then configure customized slot mapping and available appointment throttling. MDfit optimizes your online provider profiles for search engine consumption. Once a patient has selected their ideal provider, a three step process, with optional insurance eligibility, quickly books their appointment.

Where We Differ

We include condition-based descriptive keywords, provider competencies, and location details to elevate local search engine results. By using proper tags, URLs, titles and descriptions, MDfit's provider profiles drive traffic to your provider's online pages. And MDfit doesn't stop working once the appointment is booked. Optional email and text message reminders work behind the scenes to reduce no-shows and prevent cancellations.

“ Set the pace of direct or queue-based online scheduling. ”
